BRING it HOME

Adults receiving government assistance for their housing can be evicted from their homes for the possession, use, and cultivation of cannabis.

Although 30 states, the District of Columbia and Puerto Rico have legalized some form of cannabis, as long as the federal government classifies cannabis as Schedule One substance, adults cannot use, possess, or grow cannabis if they receive any government assistance. This needs to change.

You are invited to assist, organize, and attend a Bring It Home demonstration on Monday, April 2. We suggest creating a Facebook Event for the demonstration and sharing it with us so we can help publicize it.
